

Chris,

The request made to retract/ correct your latest article from the 21st will need to be met before any further statements will be given to you. It had been the hope this change would have been made within the day.

Your article made it appear Robert's statements were given after the hearing misrepresenting how the events of the trial really went, misrepresenting your diligence in reporting the facts, and misrepresenting how Robert's feelings had changed towards the judicial system in regards to their "negligence" now describing it with having more malicious intent. You would have known his feelings had changed if you wouldn't have left without speaking to him.

So again, it is being politely requested that you...

1. Issue a retraction of the latest article with an apology for mistaken misrepresentation of the facts.
2. Republish the article with the complete quote that you would have been given had you spoken with the family after the hearing.

"My Daughter Jupiter deserves justice. Arthur Kollie deserves to be punished to the fullest extent of the law.

During today's hearing, it caused me great pain when I realized our system is as hateful as the man who murdered my daughter.

That's why I've decided to, with the help of local Pro-White advocates, file Fargo Anti-White Hate Crime and Bias reports not only against Arthur Kollie for what he did to my daughter but also against Judge Irby, The Cass County Court, and every individual and institution that is currently terrorizing my family.

From the very beginning in dealing with the state's attorney, I have insisted that Kollie be punished to the fullest extent of the law. White people have Civil Rights and Arthur Kollie has a history of attacking White people. Federal hate-crime charges put the death penalty on the table.

We're not going to stand by and let them do this to another family.

We're going to get justice for Jupiter."

3. A personal promise from you be made that any biases you or your publication may hold towards White people NOT affect your reporting of this story. Some acknowledgement from the media that you play a role in quelling any social strife is important. Institutional biases towards a group, White people, that has had no explicit representation for decades has to change. The Paulsen family should receive the same compassion as any other grieving family. That includes sticking around to report how they feel after each hearing, not mysteriously obtaining one of their cell numbers and harvesting a quote from them out of context.

The meeting of the request to cease contact with the family is much appreciated but failing to make the changes to the article is causing unneeded harm and suspicion of your intent. Please make the changes as soon as possible.

Respectfully

Justice For Jupiter Staff
